Special Topics Course: 
(Spring 2019)
Aviation Fire Dynamics
Covers issues related to both military and commercial, fixed and rotary wing aircraft.

Did you ever wonder what happened that fatal day to TWA Flight 800 in 1996 off of Long Island, New York, and how it can be avoided?

Or what can happen if an aircraft suffers a brake fire on landing?

How about Air France Flight 4590 outside of Paris, France, the last commercial supersonic airliner?

Curious, email DrD with questions, at Peter.Disimile@uc.edu
