Weather Policy

In the event of snow or bad weather, I recommend each student email me before attempting to come to class.

If the University is open, I will attempt to have class. If the University is closed for part of class, the entire class is cancelled.

If for some reason I cannot make it in due to severe weather, I will try to post an email to all students in the class (or at least to the students for which I have an email address).

No student will be penalized for not attending class due to bad weather.

Regards
DrD
